WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING AUTHORITY

International application No.  
PCT/JP2005/006111

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1 - 6	YES
	Claims		NO
Inventive step (IS)	Claims	1 - 6	YES
	Claims		NO
Industrial applicability (IA)	Claims	1 - 6	YES
	Claims		NO

2. Citations and explanations:

This opinion is based on the descriptions in the following documents cited in the ISR.

Document 1: WO 02/088112 A1 (Zen'yaku Kogyo Kabushiki Kaisha)  
Document 2: WO 96/10024 A1 (Daiichi Pharmaceutical Co., Ltd.)

Claims 1-6

Document 1 describes a 1,3,5-triazine derivative having anti-malignant tumor activity. Here, upon comparison of the inventions in claims 1-6 and matters described in document 1, the former substitutes a substituent represented by [OY] in a benzimidazole ring, whereas the former substitutes a hydroxyl group in the corresponding position.

No documents were found that described or suggested making a hydroxyl group with an alkyl substituent in the corresponding position, while document 2 is also similar in the description relating to a similar use.

As such, the inventions of the present application could not be easily conceived of by a person skilled in the art from the descriptions in documents 1 and 2.

Thus, the inventions in claims 1 to 6 appear to possess novelty and involve an inventive step based on the descriptions in documents 1 and 2.
